HOT4SHIRTS DTF QUICK START GUIDE

Updated: October 30, 2026

What is DTF (Direct To Film)?

DTF is the process of printing a design on a clear film and then transferring it to fabric.

Fabrics DTF Works On

- Light, dark, and black garments
- 100% cotton
- Polyester
- Nylon
- Leather fabrics
- 50/50 blends and more

Why Buy T2B DTF Transfers?

- No weeding
- No layering vinyl
- Applies to cotton and any color shirts
- Fast production (press and go)
- High-quality finished shirts
- Only requires a heat press (no expensive setup equipment)

DTF Heat Press Instructions

1) Pre-press garment for 10-15 seconds to remove moisture.
2) Let garment cool, place transfer image-side up, cover with butcher/parchment paper.
3) Press at 320-325 F for 15 seconds with heavy pressure.
4) Peel warm.
5) Cover again and press for an additional 15 seconds.

Care Instructions

1) Turn garment inside out before washing.
2) Wash with cold water.
3) Do not use bleach or fabric softener. Dry on low heat.
